Creating the ultimate living environment

Poroti Water Treatment Plant Filter Media Upgrade

Matthew Malaghan

I would like to acknowledge the great service that was provided by your Company, in providing us the Whangarei District Council Whau Valley Water Treatment Plant with all the information pertaining to the purchase of 23m³ of 1.20mm-2.20mm modified Pumice. This was required to top up two of our filters at our Poroti Water Treatment plant which had previously been loaded with Pumice but due to backwashing loss after 5 years and short backwash times was required to be topped up again to increase our backwash times.

This has now been achieved with very good results both with our filter turbidities and extended backwash times.

This product was delivered to the site in 1 mt Bulk bags on time and very good condition and at good competitive price.

We will be looking at upgrading three more filters soon, so will look forward to dealing with your company again until then.

Kind Regards
Dave Read
